TO WHOMSOEVER IT MAY CONCERN

I write this to express my interest in the position of Intern – IT Integrated Solutions that I came across on LinkedIn. I am a diligent and zealous Master of Science student of Telecommunication System Management program at Northeastern University and I aspire to be part of Molina Healthcare that would provide the perfect platform to help me grow both technically and professionally.

Passionate about the field of computer networking, I have worked on projects such as Content Delivery Networks, Web Crawler, and network designs. These projects have given me a solid understanding of the network fundamentals and have also given me experience with languages like TCL, PERL and python. I believe, with the experience I have, I can be someone who can efficaciously diagnose and resolve computer networking issues.

My internship experiences have given me in-depth knowledge in the field of networking. I have configured routers and switches and have worked on designing networks, cell swapping, installation of Huawei Basic Transceiver systems and 4G integration in Muscat, Oman. I am adept and experienced in performing network maintenance and troubleshooting of switches and routers. In addition, my outstanding ability to work hard, be a team player, and meet the goals on time have contributed to my success in networking and were also appreciated by my supervisors during my internships.

I trust I have the qualities and the required skills that would make me the best fit for this position and an asset to the company. Kindly please find the enclosed resume which would give a detailed understanding of my accomplishments and abilities. I would appreciate your consideration and welcome a discussion about the position and learn more about your requirements in an interview. You can contact me at (857) 383-1096 by phone or by email at mohan.a@husky.neu.edu.

Thank you for your time and consideration.

Respectfully,

Arvind Mohan
Graduate Student, Northeastern University
